**FUTURE TECH**

# Preschool Programs

## Technology, Science and Art

**Hands-on, educational and fun creations!**

**Each week will be something new and exciting!**

**[www.imaginetthatfun.com](http://www.imaginetthatfun.com) 770-455-1980**

### Objectives

- ◇ Provide exceptional, educational programs in a friendly small group setting using positive reinforcement so that children LOVE learning!
- ◇ Stimulate the children's love for learning by using multi-intelligence teaching methods.
- ◇ Give the children an excellent basis in science, technology and art

3 great classes to choose from or combine them all for a 3 hour Morning Preschool Program that goes above and beyond! Your child will not be able to stop talking about this!

### Technomania: Technology and Building Class

You will not believe what your child will be creating with LEGO® Education's Tech Machines! We will build working machines with moving parts using small-hand friendly tools such as screwdrivers and integrated screws.

- ◇ These machines have: reels, hooks, scoops and propellers!
- ◇ The children will learn problem-solving, increase communication skills as they work in teams and develop fine motor skills...all while having a GREAT time!

### Art Adventures:

In our exciting Preschool Art Classes we will work with your young artists to help them develop the ability to create and express themselves through many different media. The children will refine their hand-eye coordination and fine motor skills as they work with Clay, Weaving, Bubble Painting, Mask Making, Puppets, Marbling and, of course, Drawing and Painting!

### Science Discoveries:

"I'M A NUT!!!" That's what your child will say after a day of Imagine That! where we don't just learn science we become it. We use our imaginations and hands-on science experiments to learn about the world around us.

In Nature News we zip up the xylem and flow down the phloem as we learn about trees and become "nuts". The children become predators and prey as they explore the relationship between man and beast.

In Prehistoric Picassos our students will study fossils, become a dinosaur and make crystals. They will have a fossil dig and have to identify a polished stone, a volcanic rock, and a fossil.
