# Imagine That & Future Tech Science, Programming and Robotics

Did someone  
say Robots???

## Science *and* Robots???

**YES!!** This is all you could ask for! Come join us this spring at your school as we learn science, build robots and learn programming!

**Hands-On EXCITEMENT!**

### Grades K-2nd: Time and Tech

For our science discoveries we will explore geology, caves, dinosaurs and more!

As we explore fascinating earth and prehistoric science we will make fossils and crystals, explore the animals and formations in caves, discover more about dinosaurs, create a volcano and pan for gold, just to name a few!

Your child will go on a technology and robotics adventure as they build activities using simple machines and drop and drag programming with motorized LEGO® We Do™ Robots.

Build and program a crocodile, a wolf, a turtle and lots more! See their excitement as they learn how machines and robots work!

### Grades 2 -5: Robots in Flight!

Note: Minimum age is 8.

Wait until your child brings home their own glider that they made, and can explain the principles of atmospheric flight to you! What forces were acting on the remote controlled plane that they flew?

What does the pressure of the atmosphere have to do with flight? Come join the fun as our students become experts!

In the **Robotics and Programming** portion of the class, our students will MINDSTORM their way through robotics and programming, creating amazing robots with sensors. We challenge your child in building and programming using Lego® Mindstorms® NXT's Robots. Watch for the Domabot robot build!

Be ready to be amazed with their ability to program their own games and videos! They will create challenges for their classmates using reasoning, sequential thought and Scratch Programming! We will also introduce Alice 2.2, the next step in programming videos which allows the students to control facial features and realistic body movements while creating their own storyline.
