

Did someone say  
**ROBOTS???**

**Imagine That! and Future Tech  
The STEAM Specialist!**

## Technology and Robotics

Your child's adventure into Robotics,  
Programming and Technology

Watch the love for technology spark in your  
child as we make learning **FUN!**

### **Grades K-2 Robo-Rangers      1 hour and 15 minutes**

All new adventures this spring! Just wait until your child tells you about the amazing world of programming, robotics, and technology that they will explore in this adventure of a lifetime!

Imagine That! kids will program a Walking Croc, a Happy Wolf and a Swimming Turtle with Lego® Education's We Do Construction set!

We will learn about motorized and simple machines as we build a Hammer and a Swiveling Tank or a Battering Ram among others fun activities.

Improve your child's programming capabilities on our tablets with Hour of Code: Foos or Box Island and Scratchjr. This is how we are meant to learn!

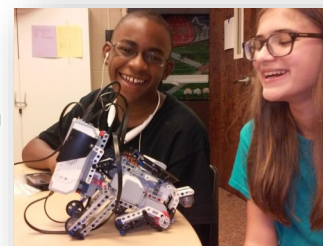

### **Grades 2-5 Robo-Tech      1 hour and 15 minutes**

Note: Must be 8 or up for this program. In all new adventures for Spring we will be using the "Domabot" and the NXT programming environment. Through learning the components of a robot and discovering the flow of a series of commands students will advance in their programming skills through various challenges.

Your child will amaze their friends with their ability to program their own games and videos! They will create challenges and games for their classmates to test using reasoning, sequential thought and Scratch Programming! We will also introduce Alice 2.2! This tool is the next step in programming videos which allows the students to control facial features and incorporate realistic body movements into their own storyline.

Engineering and Architectural skills will be utilized with LEGO® Architecture Studio and motorized machines. Students will learn to draw, design and build their own creations just like the Master Builders at LEGO!
