Grades PreK-1 Robo Rangers: An Adventure into Coding, Stop Motion, Robotics and Machines

Coding: How great would it be if you had been able to start writing code at an early age? With Box Island and Hour of Code, students will learn algorithms, loops, sequences and conditionals on their way to learning to write code on their own.

Robotics: Boost Robots: We will be introducing our newest Robot during our class! Our students will build and learn to program as they go.

Programming: Fall brings new Adventure Bots for kids at Imagine That! with **Lego® WeDo Construction** sets!

Students will be excited to build and program Dancing Birds that sing and spin and a Spinning Top that Spins and Whirls! More builds will be offered as time permits!

Machines: With Lego Technic bricks our students will learn about simple machines; build different concepts, and learn that there are different types of simple machines.
