

ROBOTICS, TECHNOLOGY, STOP MOTION AND CODING

Dates: 1/28- 5/5

No Class Days: 3/24, 4/7, 4/21

Fee (Early/Regular)

Early registration by: 1/3

\$264 / \$284

Time:

2:30-3:45

Your child's STEM adventure into Robotics, Coding, Stop Motion and Technology. See back for details. **New LONGER CLASS.**

State Bridge Crossing Elementary: Tuesday

Grades K-3 Robo Rangers: An Adventure into Coding, Stop Motion, Robotics and Machines

Watch the love for technology spark in your child as we make learning FUN!

Robo-Rangers Class Details

Grades K-2 [Robo Rangers: An Adventure into Coding, Stop Motion, Robotics and Machines](#)

Boost: Fantastic Creations for younger robotics kids. Build and program robots!

Augmented Reality (AR): New! Join the fun as we explore Augmented Reality apps, how they work, the different uses for AR in real world settings.

Computer Science: New! We find that kids are smarter and faster with technology these days but many don't know the basics of the computer itself. We will teach them!

Pivot Animator: New! Pivot Animator is a user-friendly platform creating 2D stick-man animations. The animation is made frame by frame. Your student's animation can be exported to several formats to use as a GIF or on YouTube!

New! Claymation Stop Motion: We will also reinforce frame by frame videos with Claymation/Lego Stop Motion! Students create their own stop motion film laying out a plan that starts with a storyline, character development staging and more.

Makerspace: New! This is a place that students can meet to create and engineer items that might solve a problem. Possible projects are Digital Accessories, Mechanical Toys, a Wearable, a Carnival Ride and so much more. Let's see what the kids design and Make!

Ozobots: Ozobots will go on adventures of their own this year! These are tiny little robots that can be programmed using color codes. Students start by drawing the codes to go from home to school, or the store, or the playground.

Machines: Students will build pulley systems with **Lego® Simple and Motorized Machines**. We explore how pulleys work building the different stages of pulleys with a Crane and a Conveyor Belt. Both can be motorized with your students engineering skills.

With **Lego® WeDo Construction** set we offer brand New WeDo builds! Your student will think it's a night at the Fair, with rides and games to play. We'll play Hot Shots; students attempt to score in a spinning basketball hoop and more!

Computer Coding: We will explore Blockly Games, Code Karts, and Bit By Bit. Wait until you see what they create!
